

SYED MUHAMMAD ALI GILANI

Electrical Engineer | Power Systems | PEC Registered Engineer

Satellite Town, Rawalpindi, Pakistan | +92-336-0777949

syedmuhammadaligillani111@gmail.com | linkedin.com/in/syedmuhammad-ali-gilani

PROFESSIONAL SUMMARY

Electrical Engineer (Electronics) and PEC Registered Engineer with a strong academic foundation and practical industrial exposure in hydropower generation, 132 kV substation operations, transformer testing, and power transmission & distribution. Knowledgeable in high-voltage equipment, preventive maintenance, electrical safety (LOTO), and engineering documentation. Seeking an entry-level Power Engineer position.

EDUCATION

Bachelor of Electrical Engineering

Federal Urdu University of Arts, Science and Technology (FUUAST), Islamabad

CGPA: 3.22/4.00

PROFESSIONAL EXPERIENCE

Power Systems Trainee – 32 MW Hydropower Project

- Gained practical exposure to hydropower generation processes and plant operations.
- Developed understanding of turbine, synchronous generator, excitation and governor systems.
- Learned Emergency Shutdown (ESD) procedures and Lockout/Tagout (LOTO) practices

Transformer Testing & Diagnostics Trainee – Hammad Engineering & Transformer Co.

- Developed understanding of transformer oil testing, dielectric strength, moisture analysis and DGA.
- Reviewed transformer condition assessment reports and preventive maintenance practices.
- Assisted in diagnostic procedures used to improve equipment reliability.

CORE COMPETENCIES

- Power Generation
- Power Transmission & Distribution
- Hydropower Systems
- Substation Operations
- High Voltage Systems
- Transformer Testing & Diagnostics
- Preventive Maintenance
- Electrical Safety (LOTO)

TECHNICAL SKILLS

- Engineering Software: MATLAB, Simulink, Proteus, AutoCAD, Arduino IDE, Microsoft Office
 - Engineering Knowledge: Power Systems, Electrical Machines, Transformers, High Voltage Engineering, Robotics & Automation
-

FINAL YEAR PROJECT

GNSS/INS-Based Vehicle Navigation Prototype

- Designed a prototype vehicle integrating Arduino Uno, GPS and IMU sensors for basic navigation.
 - Integrated hardware components and developed navigation logic using Arduino IDE.
 - Performed calibration, testing, troubleshooting and technical documentation.
-

PROFESSIONAL DEVELOPMENT & LEADERSHIP

- Organizer – YOUTH ROBOTECH
 - Participant – AI INNOFEST (Bahria University)
 - Participant – National Youth Conference (PICSS)
 - Workshops: GNSS/INS Navigation, Line Follower Robot, Home Automation, RC Plane
-
